With roots dating back to the shipyards of nineteenth century London, Davey Lighting combines industrial design, traditional craftsmanship and the finest raw materials. Authentic and unique, lights are manufactured in England with the same attention to detail required for their original industrial purpose. Simplicity of design and choice of finish, including weathered brass and copper, polished aluminium, galvanised cast iron and shot blasted cast iron make Davey lights equally suited to traditional or contemporary schemes. From castings and spinnings to specialist engineering work, all components are made by hand by small specialist UK suppliers according to centuries-old tradition. Long standing relationships mean bespoke orders or customisation of existing lights can be made upon request without the need for high volume production.

Founded in 1885 in London's West India Docks, Davey & Co's marine lighting and hardware graced many of history's best-known vessels. As Britain's maritime heyday faded, Davey & Co used the skills honed manufacturing deck lights, saloon and navigation lanterns to launch Davey Lighting. Davey's hand-made fixtures were snapped up by the world of architecture and design, taking pride of place in locations such as the Savoy Hotel. Their industrial aesthetic and enduring appeal means Davey lights can still be spotted in many of the capital's best interiors including Shoreditch House, J Sheekey and Jamie Oliver's 15. Original BTC founder Peter Bowles acquired the company in 2010.

MAST LIGHT

MAST LIGHT

PRODUCT CODE

0751

0750

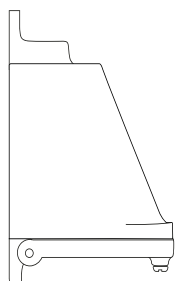

0752

A timeless design from the mid 20th century, originally a mast-mounted fitting for illuminating yacht decks. Its shape ensured rigging lines were not snagged. This clean profile lends itself to being unobtrusive when required or being used as a stylish detail for both interior and exterior accent lighting. Cast wall plaque for house numbering, available in bronze or anodised aluminium only.

BRACKET LIGHT

EXTERIOR BRACKET LIGHT

PRODUCT CODE

7680

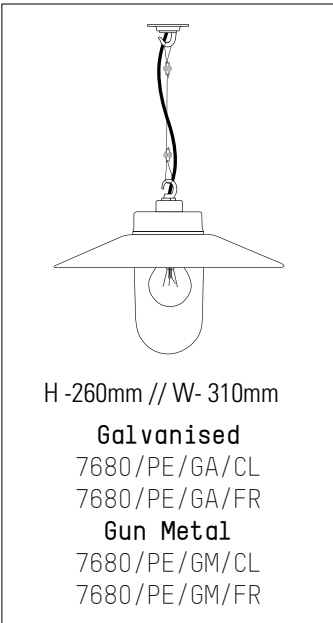

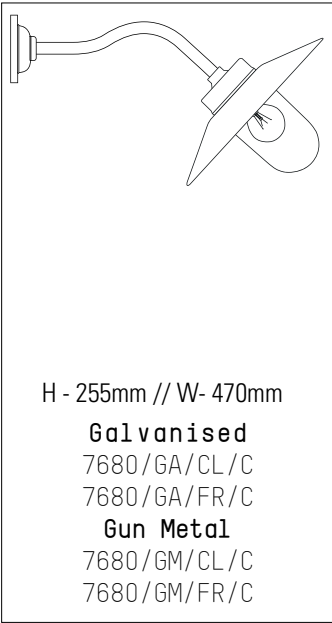

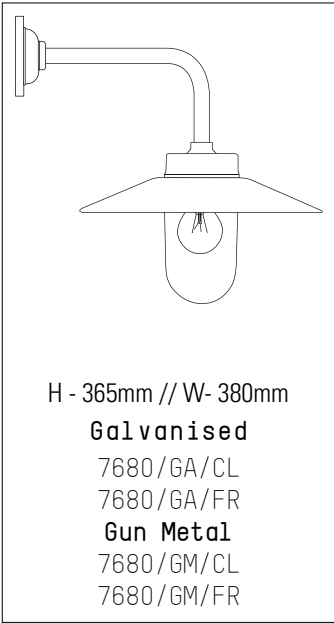

A classic, continental style well glass fitting light with screw glass. This wall or pendant light has a clean design and suits both traditional and modern locations.

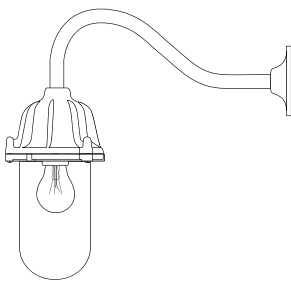

Crafted out of galvanised iron or raw sand blasted bronze, the light has a heavy cast construction. The wall light is available with a standard right angle arm or in the classic French canted version. Mounted either on a round base or on a corner fork.

SPUN PENDANTS

SPUN REFLECTOR PENDANT

PRODUCT CODE

7163
7164

Extra large factory-style reflector pendants are available in two finishes: interior and exterior-polished aluminium or weathered copper with a polished copper interior.

Davey re- introduced a mid-century wooden chuck found in the archives. Rough from years of use, the chuck leaves a wood grain imprint in the metal, giving each light a beautifully individual, unprocessed look.

TABLE & FLOOR LIGHTS

WELL GLASS TABLE LIGHT

PRODUCT CODE

7521
7523

The Well Glass Table light was designed as a portable hand-held task light. Originally fitted with a long rubber cable for easy transportation and a loop for hanging on ship's decks or stable doors, today, the rubber has been exchanged for a cotton braided cable so the light can be placed on flat surfaces or suspended. Hand-cast in Birmingham and fitted with glass blown at Davey's Birmingham glassworks, the Well Glass table light is manufactured with the same attention to detail required for its original industrial purpose.

COTTON BRAIDED FLEX

Cotton braided flex is available in green/taupe, blue/taupe, sand/taupe, gold, gold/burgundy, burgundy, black/tango, black/white and plain black. Joining the cotton braided flex are two woven metallic cables, Tinned and Armour, used for industrial-style lights.

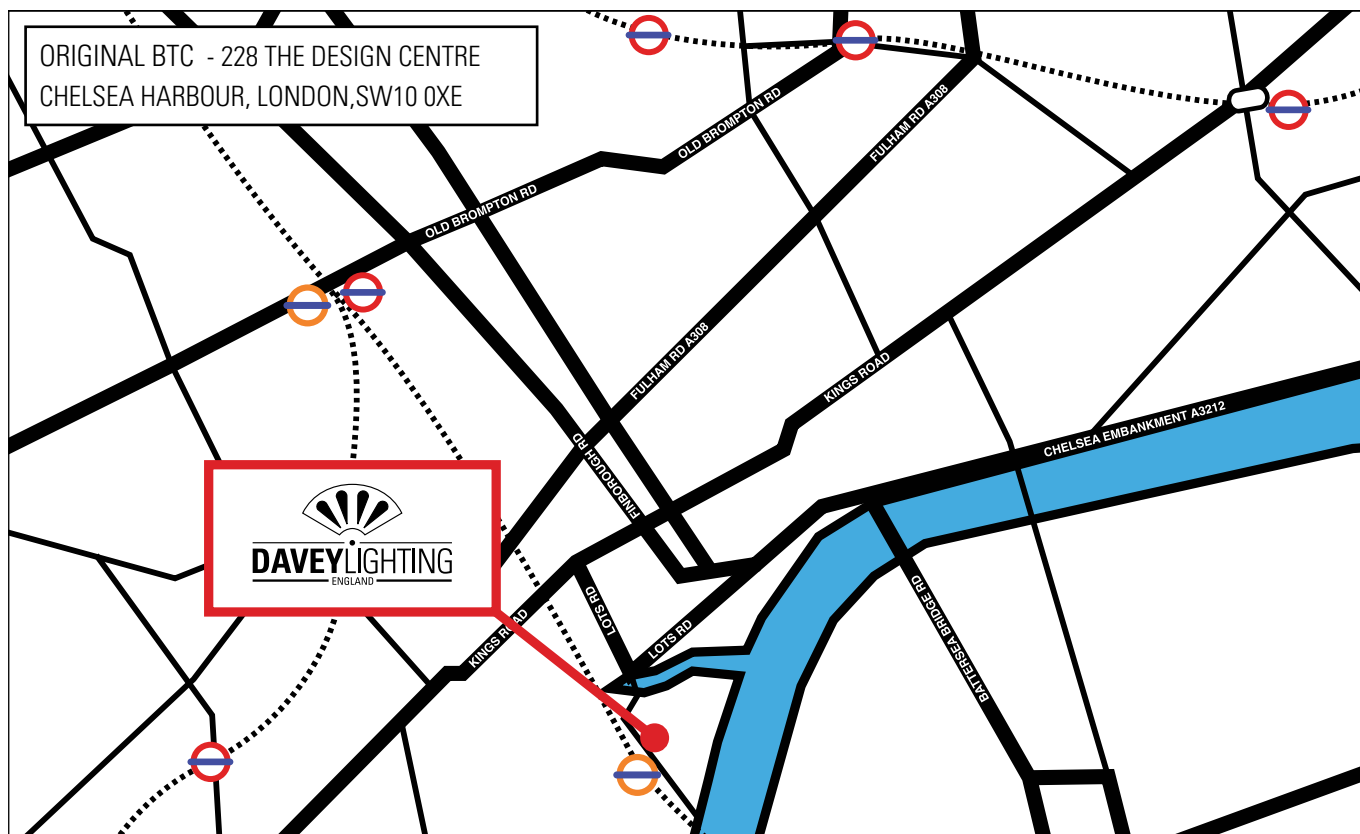

SQUIRREL CAGE BULB 9905

Originally a ship's navigation lamp. The filament profile ensured an equal brightness from all directions. Today this unusual lamp is a striking feature, whether in a traditional or modern lantern. Rated at 2000 hours, slight dimming will prolong life and further enhance the effect of the glowing filament.

E27

60W

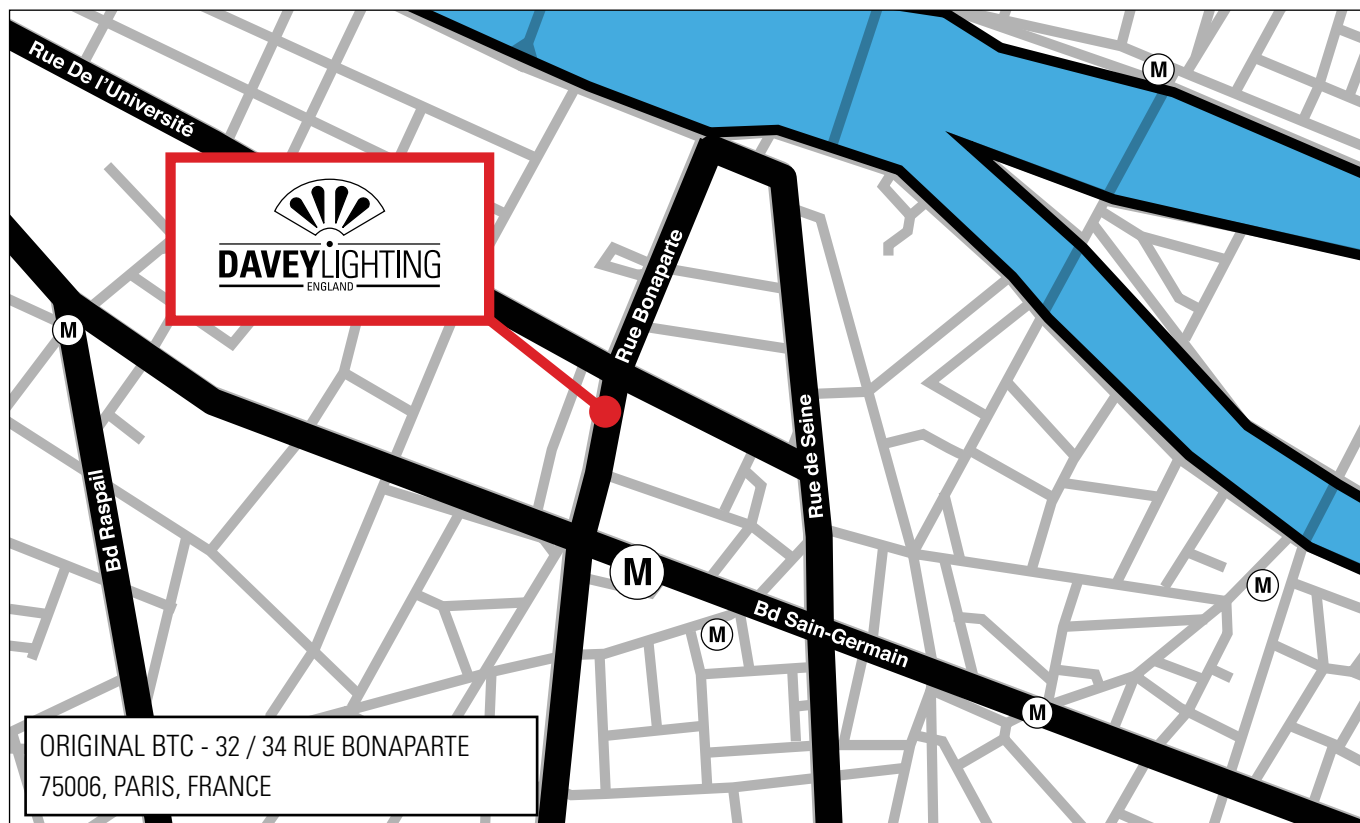

By Train - Imperial Wharf (Overground Line), linking mainline stations Clapham Junction in the south and Willesden Junction in the north connects to West Brompton, Olympia and Shepherd's Bush for the London Underground. The Design centre is situated opposite Imperial Wharf station. From the station, walk 200 yards up Lots road and you will find the main entrance on the right hand side.

By Bus - The C3 runs between Earl's Court tube and Clapham Junction mainline stations and goes to Chelsea Harbour, approximately every 10 minutes. Both the number 11 and 22 buses, serving Sloane Square and the West End, run along the King's Road (alight at the Lots Road bus stop).

By Car - Design Centre Chelsea Harbour is outside the congestion zone. There are over 1,000 spaces in a secure underground car park. A valet parking service is available on request. Access via Lots road.

Our Showroom is located on the second floor of the middle dome.

By Metro - Saint Germain des Pres station

By Bus - Numbers 95, 39, 86, 63

Parking - Public parking available around Saint Germain des Pres
